

# REDIS SETUP

## Install redis

```
apt-get install redis
```

## Edit redis.conf

```
nano /etc/redis/redis.conf (supervised no changed to supervised systemd)
```

## Restart redis

```
Systemctl restart redis-server.service
```

## default caching

```
bin/magento setup:config:set --cache-backend=redis  
--cache-backend-redis-server=127.0.0.1  
--cache-backend-redis-db=0
```

## page caching

```
bin/magento setup:config:set --page-cache=redis  
--page-cache-redis-server=127.0.0.1 --page-cache-redis-db=1
```

## session cache

```
bin/magento setup:config:set --session-save=redis  
--session-save-redis-host=127.0.0.1  
--session-save-redis-log-level=4 --session-save-redis-db=2
```

```
systemctl restart redis-server.service
```
